D02: 1 d4 d5 2 Nf3 sidelines, including 2...Nf6 3 g3 and 2...Nf6 3 Bf4 Welcome! We are going to start our journey into the London System. Our piece configuration is going to start out solidly and unassuming: D4, Bf4, e3, Nd2, c3, Bd3, Ngf3. However, we are going to quickly spring our pieces forward with moves like Ne5 and h4! 1.e4 e5 2.Nf3 Nc6 3.Bc4 Italian. Our list of standard developing moves includes O-O, Nc3, d3, h3 (the pin on g4 is very annoying), Bg5 (Be3), Re1. Later Nd5 is useful. Pushing d4 is often a good idea. **3...Nf6 4.d3**

[Normally, I would suggest a developing move. However, there is a tactical problem with it: 4.Nc3?! Nxe4! 5.Nxe4 d5! \$15 and Black wins back the pieces while having removed our central pawn.]

4...Bc5 You will not believe what the most played move is after 4...Bc5. **5.Nc3!?** Since this would be our set-up, it makes sense to prevent d7-d5 right now.

[There is of course, nothing wrong with castling immediately. The only issue I have is that Black could then aim for d7-d5 and then you have to be extremely precise and tactical to achieve a good position. [5.c3 is the most played move in the online database! d6 6.O-O 0-0 Believe it or not, the most played move and a decent one would be 7.Bb3 . These are some deep subtle moves. If I were to explain them shortly, it would look like this: 5.c3 makes the possible pin after Bc8-g4 not dangerous, as there would be no Nc6-d4 follow-up. White would handle the pin with h2-h3 and a typical maneuver Nb1-d2-f1-g3. 7.Bb3 is an important move because it saves the bishop pair (Nc6-a5 was a positional threat in some lines). None of this is obvious, which is why I chose another line for this repertoire.]

5...0-0

[5...d6 6.h3!? h6 Castling short could lead to an attack for Black after g7-g5-g4. That is why it is more practical to play 7.Be3 first. (6...Na5 7.Bb3 Nxb3 8.axb3 0-0 9.O-O transposes to the mainline.) 7.Be3!? 7) White: 1.e4 vs. 1...e5-Italian 3...Nf6, 4 Opening Compass for Black and White 2023]

6.O-O d6 7.h3 I suggest you play this move whenever Bc8-g4 becomes possible. There are certain situations when we can allow this pin, but we could talk about this in some other courses. Here are some useful moves for White: Bc1-e3(g5) (developing the bishop), Nc3-a4 (getting the bishop pair), Rf1-e1 or even Nc3-d5 (preparing c2-c3+d3-d4). **7...h6 8.Be3!?** This is a logical developing move. White is preparing d3-d4, for example.

[White can also try to get the bishop

8...Bb6

[8...Bxe3 9.fxe3 Now our f1-rook is developed. The useful moves would be d3-d4 or Qd1-e1-g3 (h4) preparing the attack on the kingside. White could double rooks after that. Na5 10.Bb3!? C67: Ruy Lopez: Berlin Defence: 4 0-0 Nxe4 **CC** HeaderStart **CC** Game: 'The file that matters' **CC** HeaderEnd **CC** When I played through the following game, I had the feeling that I'd seen a great game, but I didn't understand why. After quite a bit of analysis, I think I do ! The opening is a solid anti-Berlin variation with a symmetrical pawn structure and only the faintest initiative for White. Between moves 25 and 34, AlphaZero unbalances the position: White gains an outpost for its knight on c5, control of the open e-file, an invasion square on e6 and weak black queenside pawns on a5 and c6. However AlphaZero slowly reels White in, first creating a dark-square weakness on White's kingside and then converting this weakness into an advanced pawn on g3 with 41... hxc3. Stockfish lets it all happen, evaluating the position before and after with exactly the same value (0.00) . The g3-pawn restricts the movement of the white king and AlphaZero uses this to stretch White's position to breaking point by opening an extra file - the a-file - and targeting White's queenside pawns, after which White's position eventually collapses. Game themes: 1. Avoiding the automatic occupation of an open file 2. Using a rook's pawn to weaken the opponent's king's position 3. Advanced bishop outpost 4. Improving the position of the king before the next wave of attack Game: 'The file that matters' InChapter 2 we looked at AlphaZero's

C44: Ponziani Opening and Scotch Gambit Ryan from California asks a question that I think many readers will be interested in, so I've put it in this main section instead of the mailbag: Do you know of any chess literature at all that discusses a reversed From's Gambit out of the English (1 c4 f5 2 e4 fxe4 3 d3 exd3 4 Bxd3 Nf6 5 g4, followed by g5 and Qc2)? Is this sound? Maybe I'm blind, but I've looked in 5 English books & MCO, BCO, etc. and cannot find anything on it. I've played it vs people at my level with lots of success, but I know that this means nothing at all regarding its theoretical soundness. jw: A great question. This is a fun idea and a fairly natural one (From's Gambit Reversed with c4 in) , but I see a couple of problems here, mostly due to the fact that c4 seems to hurt White in comparison with a Bird's Opening. First, on a less important level, 1. c4 f5 2. e4 e5!? looks playable since a bishop can't get to c4. I've looked at the normal solutions to the King's Gambit and see nothing too attractive - Black even has the advantage in most lines. Best looks 3.exf5 [see my analysis in the game]. The main problem I see is 2...fxe4 3.d3 exd3 4.Bxd3 Nf6 5.g4 d5! [again, see my analysis below]. You might look into 5.Nc3. 1.e4 e5 2.d4 exd4 3.c3 d3 4.Bxd3 Nc6

13. Sidelines after 1.d4 d5 05.01.2022
[Kitty Kat]

D00: 1 d4 d5: Unusual lines

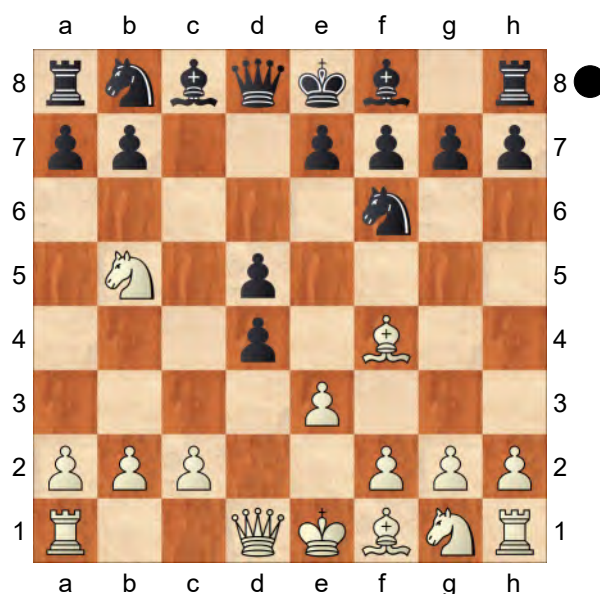

1.d4 d5 In this Chapter, we examine the sidelines after 1.d4 d5. We have dedicated Chapters on the Queen's Gambit 2.c4 and on the London System 2.Bf4 - the chapter you are looking at now features everything you need to know about White's more offbeat tries. A word about move orders: some of the variations discussed in the current chapter can be played in two move orders by White. They can choose the direction on move two or on move three, including 2.Nf3 Nf6. Common examples are 1.d4d52.g3 and 1.d4d52.Nf3Nf63.g3, or 1.d4d52.e3 and 1.d4d52.Nf3Nf63.e3. I decided to cover all these cases the same way, having the lines split already on the second move. So in this chapter, I use the move order 1.d4d52.e3 to cover all early e3 systems. Attacking the centre with c2-c4 and then using the knight afterward is the play according to classical principles. The main line of the QGD 1.d4d52.c4e63.Nc3 shows exactly this school of thought. 2.Nc3 ignores these principles but instead focuses on a fast queenside development. Our approach against 2.Nc3 should be focused on playing a quick c7-c5 break ourselves, generating play on the queenside and, in particular, on the c-file. After our natural reply 2...Nf6, we have an essential split. White develops the knight in front of their c-pawn, which is a strategically risky decision in 1. d4 d5 structures. After our natural reply 2...Nf6, we have an essential split. **2...Nf6** White has the choice between some ideas now. A) 3. Bf4 The Jobava Variation, probably White's best line. I suggest 3...c5, according to the general outline of playing the c-pawn quickly. B) 3.Bg5 The Veresov Attack, which we answer with 3...h64.Bh4c5, again using the c-

pawn to attack White's centre. C) 3.Nf3, which is toothless after 3...c5, our usual approach. There is no need to memorize lines. Natural central play will be fine (...Nc6, ...Bg4,...e6, for example). D) 3.e4? The Blackmar Diemer. We play 3...dxe4 and transpose to 2.e4?dxe43. Nc3Nf6. White has the choice between some ideas now. As usual, we attack the d4-pawn with ...c5. **4.e3** We don't need to worry about 4...Nb5?? due to 4...Qa5+. **4...cxd4** We immediately clarify the pawn structure and open the c-file, leading to a pawn structure that we know well - it's a Caro-Kann Exchange with an oddly placed c3-knight. White now needs to recapture with the pawn, leading to the mentioned structure. Note that you can't wait with 4...Nc6?, as 5.Nb5 is killing. How do we refute the move?

White goes for the Nc7+ fork, but this move does not work against best play. How do we refute the move? **5...Qa5+!** Very important! Don't play 5...Na6?, when 6.exd4 is excellent for White. We would be stuck with a terrible knight on a6. The move 5...Qa5+! is more or less winning for Black, but it's a crazy ride. Very important! Don't play 5...Na6?, when 6.exd4 is excellent for White. By now we are three (!) pawns up and have a huge c-pawn. White is ready to fork us, though - a crazy situation. It's clear White has to act now. They need to play the fork or attack our queen. It's important to note that you don't need to analyze and learn these complications by heart. Black is objectively winning, but it's not something that a human player can easily calculate. However, it is clear that we already have three pawns and a huge attack for a possible loss of the rook. In addition, we'll pick up the knight that is stranded on a8. C21: Danish Gambit Ryan from California asks a question that I think many readers will be interested in, so I've put it in this main section instead of the mailbag: Do you know of any chess literature at all that discusses a reversed From's Gambit out of the English (1 c4 f5 2 e4 fxe4 3 d3 exd3 4 Bxd3 Nf6 5 g4, followed by g5 and Qc2)? Is this sound? Maybe I'm blind, but I've looked in 5 English books & MCO, BCO, etc. and cannot find anything on it. I've played it vs people at my level with lots of success, but I know that this means nothing at all regarding its theoretical soundness. jw: A great question. This is a fun idea and a fairly natural one (From's Gambit Reversed with c4 in), but I see a couple of problems here, mostly due to the fact that c4 seems to hurt White in comparison with a Bird's Opening. First, on a less important level, 1. c4 f5 2.e4 e5!? looks playable since a bishop can't get to c4. I've looked at the normal solutions to the King's Gambit and see nothing too attractive - Black even has the advantage in most lines. Best looks 3.exf5 [see my analysis in the game]. The main problem I see is 2... fxe4 3.d3 exd3 4.Bxd3 Nf6 5.g4 d5! [again, see my analysis below]. You might look into 5.Nc3. **1.e4 e5 2.d4 exd4 3.c3 d3 4.Bxd3 Nc6N**

Welcome! We are going to start our journey into the London System. Our piece configuration is going to start out solidly and unassuming: D4, Bf4, e3, Nd2, c3, Bd3, Ngf3. However, we are going to quickly spring our pieces forward with moves like Ne5 and h4! 12.b3 ! White points out the drawback of the c5-c4 move, which temporarily restricts the movement and the development of the white pieces, but after it gets undermined by b3 cxb3 axb3, the exchange clearly favors to him as he manages to lure a black pawn out of the center while he takes towards and also next move he will be able to play d2-d4. **12...Be7 13.Qe2** This is the novelty!

[13.Na3 was played before cxb3 14.axb3 0-0 15.d4 also preferable for White, but the point of 13.Qe2 is to use the b1 knight through d2-e4 from where it is more flexible than on a3.]

First time this opening has been recorded on chessbase! Hence the Kleinhenz attack! First time this opening has been recorded on chessbase! Hence the Kleinhenz attack!

D10: Slav Defence: 3 cxd5 (without early Nf3) and 3 Nc3

1.d4 d5 2.c4 c6 3.Nc3 Nf6 4.cxd5 cxd5 5.f3!? A very interesting idea! The Kleinhenz attack. The name can be debated, as this opening was used regually by British 2014 champion Jonathan Hawkins in his youth. He played over 10 games with 5 f3!? on the British Chess circuit. So should it be called the 'Hawk' attack? The American Fide Master Carl Boor can also make a claim for the opening as he has done some work on developing the theory and has also played the opening on a number of occasions. So should it even be the Boor attack?

[Naruemon]

1.e4 Notes by Nimzowitsch In this game Black does not succeed in getting the adverse double complex to advance (White stays "put") and therefore the symptoms of the malady are not clearly distinguishable. there is compensation, however, in the observation of atypical secondary symptom, the helplessness of the White pieces. These pieces would, in the ordinary way, be quite ready to attack, but the enthusiasm for an attack is damped by the consciousness that the cO-Operation of the "pawn-party" cannot altogether be depended upon. As the incriminated body of pawns is unreliable also in a defensive sense, (for there always is a danger of its being rolled up by ...c6 and ...d5) the undecided attitude of the pieces (10 Qc2 11 Qd2) is sufficiently explained. And so the hidden weakness of the pawns is projected to a plane where it is clearly noticeable by the learner, and the study of the game is made highly valuable.

10.d5 White realizes that the mobility of his center pawns is small as d4 and still more so d5, would paralyse him on

account of the weakness of c5. Therefore he seeks to adapt the movement of his pieces to his modest circumstances in space. In this sense he could also have played 10 Nd2 (to effect a strategic retreat with f3) e.g., 10 Nd2 Bxe2 11 Qxe2 Ng4 12 f3 Nxe3 13 Qxe3 O-O 14 O-O with an approximately even position. But 10 Qd2 must be looked upon as a misuse of the modest space available, for that square should remain open and the queen, in any event, would be better placed at c2 with an eye on a4 and the eventual threat of ...d5 in view. After 10 Qd2 we recommend 10... Na5 11 Qc2 O-O followed by ...Rfe8, ... c6, and ...d5, and Black has the better position. **10...e5** Here too we should prefer ...Na5 (d4? ...Nxc4)

11.g4 Now in order as Black's castled position is in jeopardy. **11...Bg6** In order to play ...f5, but this proves impractical, and the only result is a decentralised knight on h7. **12.h4**

Nh4 would also have been sufficient. **12...h6** This loses a piece. black had only reckoned with 13 Bxh6 which by the way would also have been strong, e.g., 13 Bxh6 Bg2 14 Rh2 Bxf3 15 Bxf3 gxh6 16 Qxh6 f6 17 Bg4.

B01: Scandinavian Defence

Davies, Nigel: 'UNDERSTANDING THE OPENINGS The Scandinavian with 3... Qd6 and 5...g6 - Part I by GM Nigel Davies One of my favourite books on middlegame strategy is "Zoom 001: Zero Hour to Operative Opening Models" by Stefan Zeuthen and Bent Larsen. Zeuthen thought that good middlegame play is largely a question of pattern recognition, so collected together 451 games the Gruenfeld/Catalan structure (kingside fianchetto and then playing with the d- and c-pawns) and had Bent Larsen supply pithy but insightful notes. The idea was that the reader should play through all the games and explanations, and would then have an improved understanding of these position types. I went through it twice and started playing "Zoom" type openings in my own games. There is one slight issue that there did not seem to be a standard way to get this structure against 1.e4, the Alekhine, Caro-Kann and French Defences will often get there but not all the time. This article will examine another approach, the Scandinavian with 3...Qd6 and then 5...g6, the precise move sequence being 1.e4 d5 2.ed5 Qd5 3.Nc3 Qd6 4.d4 Nf6 5. Nf3 g6!?. It turns out that this has attracted the attention of some very strong players, with 5...g6 having been adopted by Vladimir Kramnik, Fabiano Caruana, Sergei Tiviakov, Aleksandr Rakhmanov, Alexander Motylev, Rauf

Mamedov, Boris Chatalbashev, Bojan Kurajica and other GMs. On the whole they seem to adopt it to create a complicated struggle with winning chances for Black, and are willing to take the inherent strategic risk involved with accepting a position with less space. One of the advantages of this line, as with other 3. ..Qd6 Scandinavian lines, is the flexibility of Black's position. For example, after the popular choice of 6. Nb5 there are already two queen moves, 6...Qb6 or 6...Qd8. In other lines too Black has several choices at almost every stage, which makes this a difficult opening to prepare for. My coverage of this line is mainly from Black's point of view, the material being divided up as follows: a) 6.Nb5 Qb6 b) 6.Nb5 Qd8 c) 6. g3 d) 6.Bc4 e) 6.Others' 1.e4 d5 2.exd5 Qxd5 3.Nc3 Qd6 4.d4 Nf6 5.Nf3 g6 6.Nb5 Qb6 7.c4 Strongly threatening c4-c5. 7...c6 8.Nc3 White is slightly better. 8...Bg7 9.Be2 0-0 10.0-0 Rd8 11.a3 Bf5 12.h3 Ne4 0.71/19

25...hxg4 26.Bf4 Rg6 27.Nd7+ Winning the c-pawn and after twenty more moves, the game. What interests us in the above game is primarily the role which the Nf4 has played. As a blockader he was strongly posted and excellently supported by the Bh2. Again, he had a crippling effect on Black's Bg7 and Rh6. Further, his "threat effect" was considerable, particularly on the points d5 and e6. (The mobility of White's e-pawn affords a piquant antithesis to the immobility of Black's f5 pawn). Lastly, the Knight's elasticity was striking, for he could composedly go on his travels,

C30: King's Gambit Declined

Fraser: 'Myers: This is Game #20 published in a book called "A Selection of 200 Games of Chess, Played by Correspondence, with Notes and Critical Remarks by Geo. B. Fraser, Dundee." GBF includes this short preface: "The Games which follow are selected from various Correspondence Tournaments organized under my Conductorship, between the years 1887 and 1896. With few exceptions, none of them have hitherto appeared in print. A large majority will be found to exhibit a pleasing liveliness and animation somewhat unusual in Chess by correspondence." A fair number of these games (33) were played by GBF himself, so it is evident that he was both an avid correspondence player and an early organizer of correspondence chess events. (GBF was also an active OTB player, mainly in Scotland. For example, GBF finished a respectable second in the 1st Scottish Championship, played in Glasgow in 1884, just a half-point behind the winner.) It is not known whether the games are printed in any particular order, and no dates are provided for the games individually. I have somewhat arbitrarily assigned a date of 1890 to each game, for database purposes.' **1.e4** Notes by Steinitz. **1...e5 2.f4 Bc5 3.Nf3 d6 4.c3 Bg4 5.Qb3N**

A02: Bird's Opening

[The following game is, we believe, the longest game on record as regards the number of moves, and it is also remarkable in other respects. It was played in the fifth round of the handicap of the City of London Chess Club between Messrs. Bird and Potter. Its issue was of great importance, as the loser of this game was to be thrown out altogether while the winner secured, at least, the second prize, the two players having previously won a game each and made three draws. The game lasted sixteen hours, and was played in three sittings.] CPQC iv (Apr. 1875) pp.240-3 notes by Wisker, not input 1.f4 f5 2.e3 Nf6 3.b3 e6 4.Bb2 Be7 5.Nf3 0-0

A03: Bird's Opening with 1...d5 Just to be perfectly clear, there is nothing to be learned here. If you wish to click the Continue button then you will not really be missing anything. For those who are up for a little entertainment, read on. There may be a time when you are standing in line at the DMV, or waiting behind someone with a problem at the pharmacy counter. That could be a good opportunity to put this section to use. I was going to tell the story of the best game I did not win here, but after a couple thousand words I decided below, but as I mentioned, there is nothing to be learned here, so it is only there for those who may be curious. Sometimes, something more than simply learning a specific move can be instructive. Sometimes psychology actually can become a weapon. And sometimes Bird's Opening has a major role to play, so it all somewhat ties together. So when you've got a few moments with nothing to do then copy the below link, paste it into your browser's address bar, and enjoy a story that always gives me a bit of a smile when I think of it. [<https://birdsopeningforclubplayers.wordpress.com/2023/08/05/the-best-game-i-did-not-win/>] If you are curious about the game then you can follow it below, though as I mentioned previously, there really is nothing to learn here. **1.f4 e6 2.e3 c5 3.Nf3 a6 4.b3 Nc6 5.Bb2 Nf6 6.Be2 d5 7.0-0 Bd6 8.Na3N**

C80: Open Ruy Lopez: Sidelines and 9 Nbd2

I found this game in Glenn Flear's 2000 book Open Ruy Lopez. It is also annotated by Carsten Hansen in his Miniatures in the Main Line Ruy Lopez. Both authors skip over some critical moments in the game, although in Flear's case he was writing 22 years ago, whereas I have Stockfish 15 running in the background. 1.e4 e5 2.Nf3 Nc6 3.Bb5 a6 4.Ba4 Nf6 5.0-0 Nxe4 6.Re1 Nc5 7.Bxc6 dxc6 8.Nxe5 Be7 9.Qe2N -0.49/20
